- Angular
- Angular JS
- Javascript
- PHP
- Codeigniter 3&4
- JQuery
- Intermediate knowledge of Git, REST APIs, AWS, Vault, Payment Gateways, Jenkins, and SonarQube

WORK EXPERIENCE

NEURONEST AI PRIVATE LIMITED

2024 - Present

FULLSTACK DEVELOPER

Since joining the company, I have independently handled **7 projects**, demonstrating strong ownership and technical expertise. Out of these, I have successfully delivered **3 projects end-to-end based on my own knowledge** and implementation.

- **Key Projects:**
- JURIST BOT
- DIGINEST AI
- Customized CHATBOT AI
- NEUROLINK AI
- VAITHIYAR POOVA

Neurolink AI :

Neurolink AI is a comprehensive **AI-powered SaaS platform developed to address real-time security** and workplace automation challenges. The platform consists of four **core AI-driven** use cases:

- **Facial Attendance** – Automated face recognition-based attendance tracking system with real-time dashboard and log export capability.
- **People In/Out Monitoring** – Detects and logs human entry and exit movements using intelligent camera feeds.
- **Crowd Detection** – Identifies and alerts when crowd density exceeds predefined thresholds in monitored areas.
- **Zone Security Alerts** – Customizable virtual zones with intrusion detection and instant alert mechanisms.

Chatbox :

I have created a custom **chatbox** that **can be customized by anyone for any company**. It can be tailored to their specific needs and used for their business.

Vaithiyar Poova :

Vaithiyar Poova is a healthcare-focused **web platform designed to streamline traditional medical consultations and improve patient engagement** in rural and urban regions. It bridges the gap between users and practitioners through a digital-first approach rooted in cultural familiarity and trust.

Core Features:

- **Doctor Booking System** – Enables users to browse, select, and book appointments with Siddha/Unani practitioners or traditional doctors.
- **Symptom-based Triage** – Users can input basic symptoms to receive initial guidance and doctor recommendations.
- **Medical Advice Archive** – A growing repository of health advice and remedies curated by experts in traditional medicine.
- **Multilingual Support** – Offers regional language accessibility to cater to non-English-speaking users for a more inclusive user experience.
- **Admin Dashboard** – Allows platform managers to add doctors, manage bookings, view user statistics, and update health tips dynamically.

Diginest AI :

Diginest AI, a bot-based system that includes an appointment bot, a product-based bot, and a web bot. This project allows companies to customize chat boxes and use bots based on their company ID. Since this is a new project for us, **I am responsible for chatbox customization and customer support automation**. The customer support bot **will generate FAQ questions for customers and maintain ticket history**.

Jurist bot AI :

Initially i have created the jurist bot landing page it is on live project (SAAS project).

ANNAMSOFT PRIVATE LIMITED

2021 – 2024

SOFTWARE ENGINEER

A software development company specializing in web solutions selling corn and seeds.

- Implemented and successfully doing my all task and its functionality.
- Successfully created pages like **Notification, Campaign management, Campaign summary** and log pages.
- Created new functionalities such as **Redemption and Rewards** functionality, enabling customer reward redemption.
- **Optimized a stored procedure**, leading to a substantial reduction in load times for retrieving datasets.
- Led the office to obtain immeasurable success and glory.

Bayer:

Bayer has **projects in India, Vietnam, Peru, Indonesia, and 11 other countries**. I have worked eith this all country projects. A global company specializing in **healthcare and agriculture**. Implemented and successfully launched the redemption and rewards functionality for Bayer. **Optimized a crucial stored procedure for loading extensive datasets**.

Drools:

Skilled in initiating projects and conducting thorough requirement analysis. Developed RESTful APIs for front-end to back-end communication. Developed RESTful APIs for front-end to back-end communication. Initiated a database cleanup package for enhanced data quality.

VOLUNTEERING

I worked as a **Full Stack Development tutor at Zenecks Infotech in Coimbatore for a duration of 6 months (Part-Time)**. During this period, I handled two batches and **trained over 50 students in total**. I was responsible for delivering **comprehensive training in both front-end and back-end technologies**.

- The course covered core full-stack technologies including **HTML, CSS, JavaScript, React, Node.js, MySQL, and more**. I focused not only on teaching theoretical concepts but also on helping students build real-time projects and gain practical experience.
- I'm proud to say that all of my students successfully completed the course under my guidance, and many of them have gone on to start their careers in tech. **This experience greatly enhanced my teaching skills, technical knowledge, and ability to mentor aspiring developers effectively.**

INTERNSHIP

2019 – 2020

ExploWiz

Coimbatore, Tamilnadu

During my internship at ExploWiz, I worked as a **Software Engineer Intern, gaining hands-on experience in building and enhancing web-based applications**. My responsibilities included developing responsive front-end interfaces using HTML, CSS, JavaScript, and Angular, while also contributing to server-side logic using PHP and Node.js.

COURSES

Platform – UDEMY

- REACT and NODEJS course
